Title: Create a new project on the DEEP-EST system

Subject: DEEP - Public/User_Guide/Account/PI

Version: 3

Date: 19.04.2025 17:12:23

Table of Contents

Create a new project on the DEEP-EST system

With a few steps your new project will be created on our system. Each project gets assigned a fixed number of core-hours on each requested module.

1) Sign the legal documents (Usage Agreement and Principal Investigators Agreement) 2) Send an email to a.kreuzer@? with the follwoing information:

- Your project ID
- The signed legal documents

3) The dispatch now will prepare your project (set the fixed contingent for the requested modules, establish you as PI, …)

Once this is done you can start using the DEEP-EST syste with your project ressources.
You are also able to invite other people to your project: For this please let them sign
the Usage Agreement and then they can request to be part of your project via JuDoor (see here.
