# Latest news on the DEEP-EST prototype system

This is a summary of the latest news concerning the system. For a list of known problems related to the system, please refer to this page.

# System hardware

### CM nodes

### **ESB** nodes

- currently only 1 rack installed in the system (25 nodes).
- · installation of the 2 remaining racks is scheduled for mid of May

### **DAM nodes**

• all nodes still run in app-direct mode for the DCPMM (see #2366)

### **Network Federation Gateways**

- two gateway nodes for IB  $\leftrightarrow$  Extoll bridging between CM/ESB and DAM are available for the users
- for an example on how to use the gateway nodes and for further information, please refer to the batchsystem wiki page.

#### **Global resources**

# System software

### SW updates

- new SLURM version 19.5.5 with workflow support has been rolled out
  - information on how to use workflows have been added <a href="here">here</a>.
  - please, report any problems found
- · modules successfully tested in the Devel stage will be included in the production (default) stage
  - currently, the latest ParaStationMPI (including pscom) can be tested in the Devel stage

# User management

## QoS

- the quality of service groups (QoS) within Slurm (determining the jobs priority) are currently being re-organized with regards to the accounting introduced with the EAP
- please, report any issues in starting jobs or in specifying an account for your jobs using the -A option

### **BeeGFS Quotas**

• it's currently under consideration to implement a quota for the BeeGFS file system (mounted to /work)
