This page is intended to give a short overview on known issues and to provide potential solutions and workarounds to the issues seen.

Last update: 2021-12-10

System maintenance from Tuesday, 2021-12-14 to Thursday, 2021-12-16, limited user access !

To stay informed, please refer to the <u>News page</u>. Also, please pay attention to the information contained in the "Message of the day" displayed when logging onto the system.

## Detected HW and node issues

# CM nodes

- dp-cn05: memory issue node at Megware for repair (#2682)
- dp-cn25: FW issues (#2495)
- dp-cn42: memory issue (#2675)
- dp-cn[47-50]: rocky linux testbed

#### DAM nodes

• dp-dam08: memory issues (<u>#2722</u>)

### ESB nodes

- dp-esb[01-25]: currently being prepared as rocky linux testbed
- dp-esb75: node currently reserved for special use case (#2568)

## SDV nodes

- deeper-sdv cluster nodes (Haswell) have been taken offline: deeper-sdv[01-16]
  - not included in SLURM anymore
  - deeper-sdv[01-10] will be used for testing
- knl01: NVMe issues (<u>#2011</u>)

### Software issues

#### SLURM jobs

- due to introduction of accounting there is some re-configuration of user accounts needed within SLURM to assign the correct QOS levels and priorities for the jobs
  - · this might lead to (temporary) failing job starts for certain users
  - if you cannot start jobs via SLURM, please write an email to the support list: sup(at)deep-sea.eu
