**Title: Welcome to the DEEP-EST System!**

**Subject: DEEP - Public/User_Guide/Tutorial1**

**Version: 14**

**Date: 18.05.2024 13:31:16**

# Table of Contents

# Welcome to the DEEP-EST System!

This tutorial will guide your first steps on our prototype machine.
If you are new in the Modular Supercomputing area (or just interested in our roadmap) you should have a look at the section our MSA roadmap.

# I want to try it! What do I have to do?

At the moment there are 3 different groups of people who can request access to the DEEP-EST prototype:

- DEEP-SEA project members
- IO-SEA project members
- Non-project members

## Get an account on our system

The first thing to do, before starting the "real work" on the machine is to get an account.

## You already have an account? Then let's get started on the DEEP-EST prototype!

- System Overview
- Software environment
- Filesystems
- Information about the batchsystem
- Heterogeneous jobs
